

Assignment 6

L665/B659: Applying Machine Learning Techniques in CL; Sandra Kuebler

- Write a literature review. Assume, you are writing a paper on a semi-supervised approach for Romanian Word Sense disambiguation. You need to target your literature review to this topic.
- The literature review should cover at least 10 papers. You will have to search for appropriate papers.
- Write up the review. It should be about a page long.
- Make sure that a reader can understand what you are trying to convey to them. You do not need to report everything in the paper. Instead focus on what is important wrt. the topic of your paper. If you mention experiments, also mention the results. It is very hard for a reader when say something like "they compared a supervised and a semi-supervised approach" and you leave the reader wondering how they worked out.
- Write the review in the group in which you will also do the final project. When you submit as a group, please make sure that all names are on the paper, and please leave a comment with all the names on the submission site in canvas.
- This review will be peer reviewed.
- An improved version of the review should be part of your final paper.
- **DUE DATE:** Monday April 18, 1pm. Please submit via canvas.
